

eloLance SL2D

The eloLance – the new suction lance generation

The eloLance is the new suction lance generation that offers you everything to make your systems and machines more efficient and reduce your workload. Its low extraction point enables economical, sustainable handling of liquids and reduces residual quantities in the container. Their high reliability and resistance in a wide range of liquids, combined with simple, safe operation, are strong arguments for users. This makes suction lances the ideal solution for use in canisters.

Product characteristics

- Seal-free design
- Low extraction point
- Easy handling due to ergonomical head
- 1 or 2 switching points possible: pre-empty and empty switching point
- High resistance due to optimised wall thickness for components in contact with media
- Clamping cone for variable height adjustment
- Horizontal hose and cable outlet
- Ball leakage brake
