

## Safety sensor 122MSV

The smallest type of cylindrical safety sensors from elobau – these sensors can hold their own despite their small size. The completely sealed stainless steel housing can withstand even intense cleaning with aggressive media at extreme temperatures (from -25 °C to +80 °C, IP6K9K protection class).

A reliable switching function is guaranteed by the large operating distance of up to 9.5 mm. In this age of miniaturization, it's the perfect solution for the hygienic environment of the food and packaging industry.

### Technical specifications
