

## Tilt sensor N3

The robustly designed N3 tilt sensor has a high impact and vibration resistance so is frequently used for tilt measurement in construction machinery, industrial trucks and adverse industrial environments. The N3 tilt sensor also has a high resolution and repeating accuracy. It can be easily programmed and the neutral position adjusted with the corresponding infrared remote control.

### Product characteristics

- Long service life and reliability thanks to the mechanics-free MEMS technology
- The analogue output signals can be combined with additional switching points
- Tilt range up to  $\pm 60^\circ$
- IP67 protection class
- Operating range from  $-40^\circ\text{C}$  to  $+70^\circ\text{C}$
- Analogue current or voltage output, or volt free switching output via relay
- Depending on the angle, resolution up to  $\leq 0.04^\circ$
- Adjustment of the neutral position possible through remote control
- Selectable switch-on and switch-off delay at the switching output
